

ABOUT

GlobalSim, Inc. is an employee-owned company that specializes in developing training simulators for cranes and heavy equipment. We are recognized throughout the world as the leading provider of premium crane simulators, which we supply to commercial and government clients. GlobalSim manufactures, sells, and services our training simulators from our headquarters in metropolitan Salt Lake City, Utah, USA. Our systems are actively used by training centers throughout the world and can be found on six different continents.

COMPETENCIES

GlobalSim offers a product line of Commercial Off-The-Shelf training systems that can be modified to provide maximum realism in a simulated environment. Over 25 different model types can be preloaded onto one of our premium simulators and configured specific to a customer's needs.

Our systems are designed by an experienced team of software engineers, hardware technicians, graphic designers, and computer scientists with backgrounds in mathematics and physics-based simulation. Additionally, GlobalSim employs a certified equipment operator to help conduct testing. Our training and customer support teams are readily available remotely and can be deployed anywhere on the planet to provide expertise and assistance.
